

CASE SUMMARY

Case #2011/1308

Complainant: Todd Herren
5523 Blackberry Lane
Lafayette, Indiana 47905

Applicator: Kevin Potts
Caddyshack Lawn Care
7936 S. 250 E.
Lafayette, Indiana 47909
765-404-6307

1. On July 21, 2011, I, Agent George N. Saxton of the Office of Indiana State Chemist (OISC), performed an investigation at the complainant's property in response to a claim of injury/damage to non-target trees and shrubs possibly resulting from exposure to the herbicide Imprelis. A Notice of Inspection was issued to Kevin Potts. I observed the following during my on-site investigation:
 - a) Tops of trees twisting and curling and browning of tips of needles (see figures #1, 2 & 3).
2. I took the following photos depicting injured/damaged vegetation:

Figure #1

Figure #2

Figure #3

3. I collected the following vegetation samples from visibly impacted non-target vegetation as described in paragraph #1 for examination by the Purdue Plant Pest Diagnostic Laboratory (PPDL).
 - A. Spruce
4. According to a report from the PPDL, *"There was no evidence of significant mite or insect injury or disease on the sample submitted. The sample had few twisting and*

distortion symptoms but pictures submitted show symptoms that are associated with injury caused by synthetic auxin (growth regulator type) herbicides. Typical symptoms caused by these herbicides can include epinasty (twisting and curving) of the leaves or needles, shoots and shoot tip; leaf cupping which can be upward or downward, and in extreme cases, new leaves can be irregular in size and shape (usually smaller than normal) and have abnormal leaf margins.”

Tom Creswell

Director, Plant and Pest Diagnostic Lab

creswell@purdue.edu

5. According to the application information collected from the applicator Imprelis Herbicide (EPA Reg. No. 352-793) was applied May 3, 2011, at the rate of 4.5 oz/acre using a Z-sprayer; no application was made to the soil within the drip line of any of the trees or ornamentals; no application was made directly to any exposed roots of any trees or ornamentals.

Disposition: No violation of the Indiana Pesticide Use and Application Law was documented against the pesticide applicator. Effective September 15, 2011, the Indiana registration for Imprelis Herbicide, EPA Reg. #352-793, was cancelled because it was determined by OISC that the product is “misbranded” (it bears label directions that are inadequate to prevent unreasonable adverse effects to non-target vegetation).

George N. Saxton
Compliance Officer

Final Date: October 21, 2011
