

CASE SUMMARY

Case #2011/1376

Complainant: Judy Paris
12339 Amethyst Circle
Carmel, IN 46032
317-844-7575

Applicator: Ed Clevenger
The Greenskeeper, Inc.
1051 Summit Dr.
Carmel, IN 46032
317-846-7131

3A, 3B Licensed
Licensed business

1. On August 3, 2011, I, Agent Thomas Smith of the Office of Indiana State Chemist (OISC) performed an investigation at the complainant's property in response to a claim of injury/damage to non-target trees and shrubs possibly resulting from exposure to the herbicide Imprelis. A Notice of Inspection was issued to Judy Paris. I observed the following during my on-site investigation:
 - a) Tops of trees were curled (see figures #1, #2, #3 & #4).
 - b) Spiraling of dead areas (see figures #1 & #2).
 - c) Needles "balled up" and brown on tips of candles (see Figures #3 & #4).
2. I took the following photos depicting injured/damaged vegetation:

Figure #1

Figure #2

Figure #3

Figure #4

3. I collected the following vegetation samples from visibly impacted non-target vegetation for examination by the Purdue Plant Pest Diagnostic Laboratory (PPDL).
 - a) *Norway Spruce*
 - b) *Blue Spruce*

4. According to a report from the PPDL, *"There was no evidence of significant mite or insect injury or disease on the sample submitted. The sample (and pictures) submitted show symptoms that are associated with injury caused by synthetic auxin (growth regulator type) herbicides. Typical symptoms caused by these herbicides can include epinasty (twisting and curving) of the leaves or needles, shoot and shoot tip; leaf cupping which can be upward or downward, and in extreme cases, new leaves can be irregular in size and shape (usually smaller than normal) and have abnormal leaf margins. When injury results in new shoot dieback in conifers there will be no re-growth this season, and with certain species, such as Norway spruce, the entire tree can die."*
5. According to the application information collected from the applicator Imprelis Herbicide (EPA Reg. No. 352-793) was applied on June 3, 2011, at the rate of 4.5 oz. per acre using hand held ground spray (truck sprayer) equipment; no application was made to the soil within the drip line of any of the trees or ornamentals; no application was made directly to any exposed roots of any trees or ornamentals.

Thomas Smith
Inspector

Date: September 2, 2011

Disposition: No violation of the Indiana Pesticide Use and Application Law was documented against the pesticide applicator. Effective September 15, 2011, the Indiana registration for Imprelis Herbicide, EPA Reg. #352-793, was cancelled because it was determined by OISC that the product is "misbranded" (it bears label directions that are inadequate to prevent unreasonable adverse effects to non-target vegetation).

George N. Saxton
